Points Exchange Table

This table is only a **guide** that gives an indication of the points exchanged based on the difference between the Ratings of the players.

The actual points exchange will be calculated accurately to 1 decimal point using a logarithm for each individual match.

An expected win/loss is where the Higher Rated player wins. An unexpected win/loss is where the Lower Rated player wins.

Players shown with zero points exchange did not play on the match evening shown

Points Difference	Expected Win	Expected Loss	Unexpected Win	Unexpected Loss
